Square Feet*

12+
Devices

AC1300
up to 1.3 Gbps

Mesh WiFi That Lets You Stream, Game, and Binge Nonstop

The MR6350 Dual-Band WiFi 5 Router covers up to 1200 square feet* and handles up to 12+ devices at speeds up to 1.3 Gbps. Powered by Intelligent Mesh™ technology that was built from the ground up, your devices will always be on the fastest path to the Internet. If your needs change and you want to grow your network, this future-ready router expands by adding any Linksys mesh-compatible products. Setup is easy using the Linksys app and you'll be streaming and ready to binge in minutes.

Features and benefits

- **Bye Bye Dead Zones**
Powered by Intelligent Mesh technology that adapts to your WiFi needs, your devices will always have a full-strength signal throughout your entire home.
- **Smarter Security**
With automatic firmware updates, Parental Controls, and separate guest access, your network will always remain safe, secure, and up to date.
- **100% Backward-Compatible**
Works with all existing WiFi enabled devices from smartphones, tablets, laptops, smart home devices, streaming devices, and more.
- **Easy Setup and Control**
The Linksys app makes it simple to set up, lets you access your network from anywhere, and view or prioritize which connected devices are using the most WiFi.

What's Inside

- Linksys Mesh WiFi Router, MR6350
- Quick Start Guide
- Ethernet Cable
- Power Adapter
- Regulatory and Warranty Documentation

Tech Specs:

WiFi AC1200 400 Mbps (2.4 GHz Band)
 867 Mbps (5 GHz Band)
 IEEE 802.11a/b/g/n/ac
 Linksys Advanced Beamforming technology
 Linksys Intelligent Mesh technology

Processor:
 716 MHz Quad-Core

Antennas for Expanded Coverage:
 Two dual-band, external, adjustable (non-detachable) antennas providing 4 simultaneous streams

Wired Connectivity for WAN and LAN Connectivity:

5 Gigabit Ethernet Ports:
 1x WAN
 4x LAN

Security:
 WPA2-Personal

Dimensions:
 (W) 204.9 mm x (D) 149.8 mm x (H) 140.8 mm (antennas up)

Easy setup and network control with the Linksys app

Maximum performance derived from IEEE Standard 802.11 specifications. Specifications are subject to change without notice. Actual performance may vary, including lower wireless network capacity, data throughput rate, range, and coverage. Number of connected devices is based on lab test results. Performance depends upon many factors, conditions and variables, including products used, interference, and other adverse conditions. Actual data throughput will be lower and may depend on the mix of wireless products used and external factors. An active, customer-purchased Internet Service Provider broadband account is required for connection of this router and other connected computers and devices to the Internet. Some devices may require additional wireless adapters that match this product's maximum WiFi standard or an Ethernet cable to connect to this router.

*Range specifications are based on performance test results under normal use case conditions. Actual ranges will increase or decrease depending on wireless obstructions, operating environments and building material. Wireless coverage claims are used only as reference and are not guaranteed, as each wireless network is unique.
